Payment methods

Installed payment methods are listed below and can be sorted to control their display order on the frontend.

Fill in all the necessary fields, specify the name (Payeer), and check the enabled box to make the system available on the site.

WooCommerce / Settings / Payments

| General | Products | Shipping | **Payments** | Accounts & Privacy | Emails | Integration | Advanced |

Payeer

Set up electronic payments through Payeer.

Enable/Disable
☑ Included

Name
Payeer

This is the name that the user sees when selecting a payment method.

URL of the merchant
https://payeer.com/merchant/

url to payment system Payeer

ID of the store
01234567

Identifier of store registered in the system "PAYEER".
Get it in Payeer account: the "Account -> Merchant -> Settings".

Secret key
•••••••

The secret key notification that payment has been made,
which is used to check the integrity of received information
and unequivocal identification of the sender.
Must match the secret key specified in Payeer account: the "Account -> Merchant -> Settings".

Path to file to log payments via Payeer (for example, /payeer_orders.log)
/payeer_orders.log

If the path is not specified, the log is not written

IP filter
123.456.78.90

The list of trusted ip addresses, you can specify a mask

Email for bugs
info@payeer.com

Email to send payment errors

Description
Payment using Payeer

A description of the method of payment which the customer will see on your website.

Save changes

Merchant URL — the default way to pay //payeer.com/merchant/ (change only if an information notice from payeer.com about the change in payment URL)

Merchant ID — id of your store in the system payeer.com (you can learn in a private office)

Secret key – the secret key of your store in the system payeer.com (you specify it yourself)

Payment description — additional comment if you pay in Payeer

Path to logfile — specify the path to the file where to write the information on all payments via Payeer (if field is empty, the entry is not happening)

You can specify a list of trusted IP addresses of servers separated by commas. You can also specify a mask instead of an IP address. If the field is left empty, then checking for trusted IP addresses is not performed.

For example:
      192.168.71.87, 192.165.83.17, 192.178.34.15
Or   192.*.71.87, 192.165.83.*, 192.*.34.15
Or   *.*.*.* - available to all IP addresses

Enter your email address to receive notices in the event of a payment error. The letter will state the reason and basic information about the payment.
Enter the URL address in the "account Payeer → API → Merchant settings"
